Assignments

Rules for submitting assignment 1 (MAEDB only)

Please read the following guidelines carefully:

- The assignment must be submitted as a .zip file, compressed in zip format, and sent as an attachment by email to praticasice@gmail.com from your official FCT email address. Please do not use other compression methods or other email addresses.
- The zip file must contain at least the files specified in the assignment rules (report.pdf, tp1.py and TP1-data.csv).
- Each member of the group must submit the zip file. If any member of the group does not submit the zip file, it will be assumed that this student did not do the assignment and will have a grade of zero. If both members submit a zip file, it must be exactly the same zip file for both.
- Note that by submitting the file, the student is claiming to have participated equally in the assignment and is subject to the ethics rules of the department. For more details, see [codigoEticaDiv1.0MEI.pdf](#)
- The deadline for submitting assignment 1 is Thursday, Saturday 27, at 23:59. There will be a tolerance period of 24h, ending on Sunday, October 28, at 23:59, but this period should be used only for correcting any problems with the submission.
- For each students, only the last email sent to praticasice@gmail.com before the deadline will be counted. So you can change the version of the assignment submitted or even withdraw your assignment (by sending an email without an attachment) up to the deadline.
- **Note that an email message without an attachment after submitting your assignment will withdraw your submission.** Do not send emails without an attachment after submitting your assignment if you do not want to give up on this evaluation.
- No submissions will be accepted after 23:59 of October 28, once the 24 hour tolerance period is over.
- I will update the submissions regularly in this page.

Submitted assignments

If your submission status is OK, check the email timestamp to confirm the version you sent. Otherwise, check the possible errors:

- No zip attachment: the last email you sent did not include a .zip attachment. If this was not on purpose (e.g. to withdraw a submission), please resend the email with the attachment. Note that no other attached files will be recognized (.rar, .7z, etc), and will give this error too.
- Zip file error: the attached file could not be decompressed as a zip file. Please check the compression method used and the file sent.
- Missing files in zip: the attached zip file does not contain all the required files for this assignment. Please use the requested file names.
- Mismatching zip files: the two group members did not send the same zip file. Please coordinate the submission so that both submit the same file.
